

Patient Information	Specimen Information	Client Information

Immunology

Test Name	Result	Reference Range	Lab
ANA SCREEN, IFA, W/REFL TITER AND PATTERN			IG
ANA SCREEN, IFA	POSITIVE	NEGATIVE	
<p>ANA IFA is a first line screen for detecting the presence of up to approximately 150 autoantibodies in various autoimmune diseases. A positive ANA IFA result is suggestive of autoimmune disease and reflexes to titer and pattern. Further laboratory testing may be considered if clinically indicated.</p> <p>For additional information, please refer to http://education.QuestDiagnostics.com/faq/FAQ177 (This link is being provided for informational/ educational purposes only.)</p>			
ANTINUCLEAR ANTIBODIES TITER AND PATTERN			IG
ANA TITER	1:80 H	titer	
<p>A low level ANA titer may be present in pre-clinical autoimmune diseases and normal individuals.</p> <p>Reference Range</p> <p><1:40 Negative</p> <p>1:40-1:80 Low Antibody Level</p> <p>>1:80 Elevated Antibody Level</p>			
ANA PATTERN	Nuclear, Speckled		
<p>Speckled pattern is associated with mixed connective tissue disease (MCTD), systemic lupus erythematosus (SLE), Sjogren's syndrome, dermatomyositis, and systemic sclerosis/polymyositis overlap.</p> <p>AC-2,4,5,29: Speckled</p> <p>International Consensus on ANA Patterns (https://doi.org/10.1515/cclm-2018-0052)</p>
