

Patient Information	Specimen Information	Client Information

Test Name	In Range	Out Of Range	Reference Range	Lab
-----------	----------	--------------	-----------------	-----

PROSTATIC ACID PHOSPHATASE (PAP) Reference Range: ADULT MALES: <2.8		2.8 H	ng/mL	EZ
--------------------------------------------------------------------------------------	--	-------	-------	----

This test was performed using the Siemens Chemiluminescent method. Values obtained from different assay methods cannot be used interchangeably. PAP levels, regardless of value, should not be interpreted as absolute evidence of the presence or absence of disease.
