

Patient Information	Specimen Information	Client Information

COMMENTS: FASTING:

Test Name	In Range	Out Of Range	Reference Range	Lab
VARICELLA ZOSTER VIRUS	<=0.90		<=0.90	
ANTIBODY (IGM)				
< or = 0.90 Negative				
0.91 - 1.09 Equivocal				
> or = 1.10 Positive				

Results from any one IgM assay should not be used as a sole determinant of a current or recent infection. Because an IgM test can yield false positive results and low levels of IgM antibody may persist for more than 12 months post infection, reliance on a single test result could be misleading. If an acute infection is suspected, consider obtaining a new specimen and submit for both IgG and IgM testing in two or more weeks.
