Lactose Tolerance Test

TESTS	RESULT	FLAG	UNITS	REFERENCE	INTERVAL	LAB
<b>Lactose Tolerance Test</b>						
Glucose 1	83		mg/dL			01
Glucose 2	150		mg/dL			01
Glucose 3	142		mg/dL			01
Glucose 4	107		mg/dL			01
Glucose 5	99		mg/dL			01
Comment:	<p>An increase in plasma glucose greater than 30 mg/dL is normal. Those with lactase deficiency will demonstrate bloating, cramps, and diarrhea, and will show a glucose increase of less than 20 mg/dL. False positive results may occur because of lack of the increase of blood glucose concentration attributable to normal insulin response to the carbohydrate load.</p>					01
