Alternate Patient ID: Not Provided Fasting: No

## General Comments \& Additional Information <br> Alternate Control Number: <br> DOB: <br> Age(y/m/d): <br> Gender: <br> Patient ID:

Lipid Panel With LDL/HDL Ratio
Triglycerides
470
High
$\mathrm{mg} / \mathrm{dL} \quad 0-149$

According to ATP-III Guidelines, HDL-C >59 mg/dL is considered a negative risk factor for CHD.
VLDL Cholesterol Cal $\mathrm{mg} / \mathrm{dL} \quad 5$ - 40
The calculation for the VLDL cholesterol is not valid when triglyceride level is $>400 \mathrm{mg} / \mathrm{dL}$.

Triglyceride result indicated is too high for an accurate LDL cholesterol estimation.

Unable to calculate result since non-numeric result obtained for component test.
